

## SPEED UP YOUR TECHNOLOGY

### TECHNOFLOW

#### SMART BUBBLE TECHNOLOGY FOR GREEN PRODUCTIONS

Techno - Flow machine uses air from the atmosphere and generates microbubbles. Chemicals and water are homogeneously mixed together and applied over garment with the help of micro bubbles.

- Three Pump System
- Operation Ability Both With Washing Machine & Dryer Machine

- User-Friendly Software

#### APPLICATIONS OF TECHNOFLOW:

Softening, For 3D Effects, Advance Finishing Applications.

# TECHNICAL TIPS OF THE WEEK

## TECHNICAL TIPS OF THE WEEK: AMBIENT CONDITIONS FOR LASER MACHINES

### Why are the ambient conditions important?

The laser machine is a sensitive machine consisting of the high-tech optic, electronic and mechanical components. In order to operate the machine with high performance and efficiency for a long time, the ambient conditions must be as below:

- Clean and dust-free environment
- The humidity and temperature value are in accordance with the specified ranges
- Do not any paint and chemical application in the environment where the laser machine is located
